

Anypoint API Governance

Anypoint API Governance

MuleSoft has recently introduced the API Governance as a part of the Anypoint Platform that enables you to apply governance ruleset to your APIs that ensures API Consistency and provides default several ruleset such as a Top 10 OWASP API Security, Anypoint API Best Practices, OpenAPI Best Practices governance rulesets etc.

API Governance will ensure the APIs design across the enterprises is consistent and it is designed with API Best Practices and Guidelines and ensure the API Security and improve the quality of APIs.

Rulesets

Choose one or more rulesets you want to use to govern your APIs.

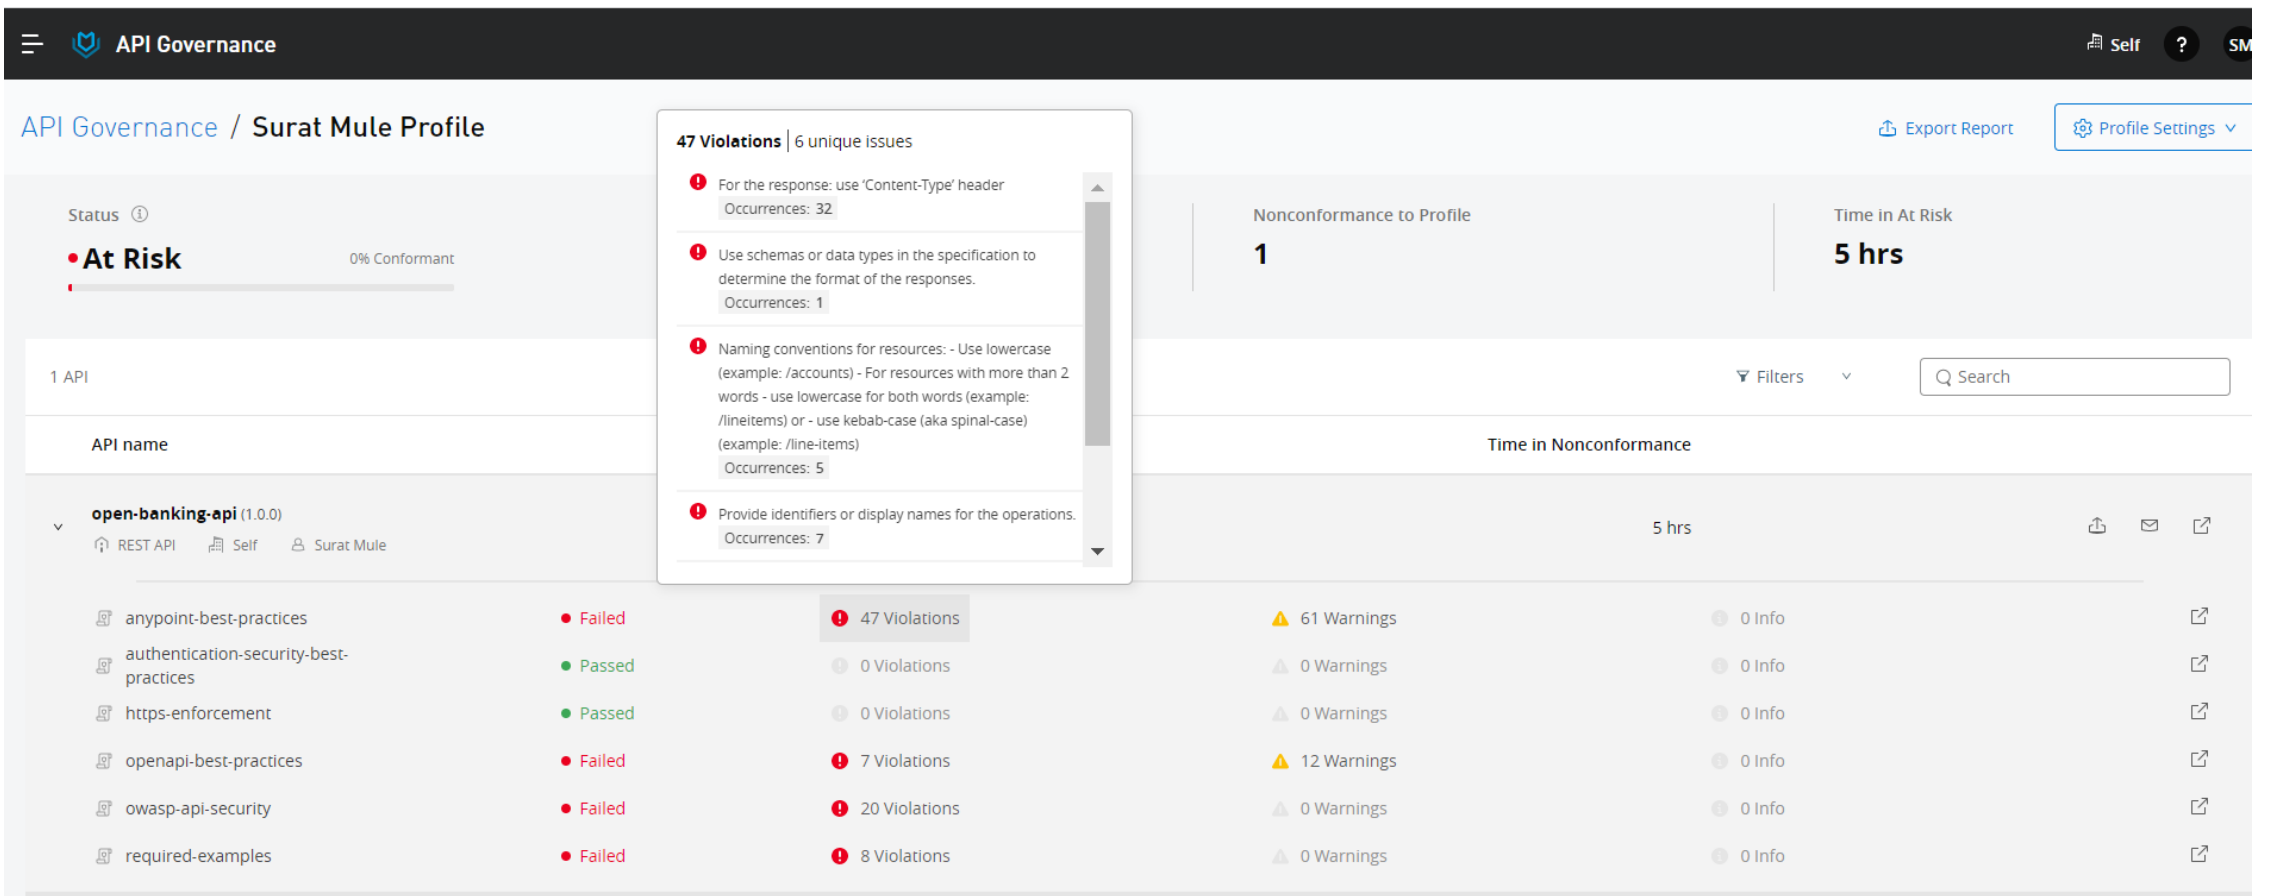

0 rulesets selected

- ☐ **Anypoint Best Practices** 1.0.0
 MuleSoft
Ruleset with over 30 best practices for APIs
[View details in Exchange](#)
- ☐ **Authentication Security Best Practices** 1.0.0
 MuleSoft
Set of 14 security best practices for API authentication
[View details in Exchange](#)
- ☐ **HTTPS Enforcement** 1.0.0
 MuleSoft
Ruleset to help ensure the use of HTTPS in APIs
[View details in Exchange](#)
- ☐ **OpenAPI Best Practices** 1.0.0
 MuleSoft
Set of 12 best practices for OpenAPI 3.0.x (compatible with OpenAPI 2.0)
[View details in Exchange](#)
- ☐ **OWASP API Security Top 10 2019 Checklist** 1.0.0
 MuleSoft
Top 10 API Security Risks checklist maintained by the OWASP API Security Project
[View details in Exchange](#)
- ☐ **Required Examples** 1.0.0
 MuleSoft
Ruleset to help ensure the presence of examples in API payloads
